

AirCide

Desinfect and Protect

Desinfect

Fully bio-based AirCide Regular products destroys viruses and bacteria. AirCide Regular is designed for all types of air filters, such as respiratory protection, face masks and all other porous surfaces which require antimicrobial treatment. AirCide Regular products enable the reuse of disposable masks.

The products meet the requirements of EN 13624, EN 13697 and EN 13727.

Protect

AirCide Clear products provide durable and long-term protection for materials against coronaviruses. AirCide Regular forms a disinfecting protective coating on the mask surface. Test show that AirCide Regular destroys the coronavirus, keeping masks clean for longer and enabling their reuse.
